J. HAL WOODFORD LOSES HORSES IN LATONIA FIRE

Kindness to a dumb brute is what caused the fire at the Latonia race track Thursday night, which destroyed the barn of Howard Oots, together with eight race horses, including the 1909 Kentucky Derby winner, Wintergreen, the property of H. E. Stewart. A man attached to the stable was doctoring a horse which had injured its side, when the lantern exploded, setting the barn on fire.

J. Hal Woodford, of Paris, was the

chief sufferer from the fire, seven of the number belonging to him. Following is a list of Mr. Woodford's horses that were lost: Carlton Club, four year-old horse by

FLIES ARE THE MOST DANGEROUS INSECTS KNOWN

Flies are the filthiest of all vermin. They are born in filth, live on filth and carry filth around with them. They are maggots before they are

Flies are known to be carriers of millions of death- dealing diseased germs. They leave some of these germs wherever they light.

Flies may infect the food you eat. They come to your kitchen or to your dining table, fresh from the privy vault, from the garbage box, from the manure pile, from the cuspidor, from decaying animal or vegetable matter, from the contagious sick room with their bodies, and they deposit it on your food, and you do swallow filth from privy vaults, etc., if you eat food that has come in contact with flies.

Flies may infect you with tuberculosis, typhoid fever, scarlet fever, diphtheria, and other infectious diseases. They have the habit of feasting on tubercular sputum and other discharges of those sick with infectious diseases and then going direct to your food, your drink, to the lips of your sleeping child, or perhaps to a small open wound on your hands or face. When germs are deposited in milk they multiply very fast; therefore milk should never be exposed to

> WHEAT CROP MAY EXCEED ALL RECORDS

The winter wheat crop this year is expected to break all records. The Department of Agriculture estimated the yield may exceed 551,000,000 bushels. The condition of the crop April 1 was ninety-five per cent. within sixtenths of normal, or 11.5 per cent. better than the average condition during the past ten years. The acreage planted last fall is estimated at 36,-000,000 acres.

### KENTUCKY'S ACTUAL DEST AMOUNTS TO \$1,799,943.28

"The State debt proper at the close of the fiscal year, June 30, 1913, was \$1,799,943.28, represented by outstanding warrants," said Assistant State Auditor G. B. Yykens, Friday, when he was shown the preliminary figures of the United States census bulletin on the Kentucky debt. "I do not like the ordinary cold creams. It isn't know how the Census Bureau arrived at the total of \$4,450,000 as the forded is very welcome, particularly amount of Kentucky's debt at that time. In addition to the deficit, there are certain school warrants on which the State pays in perpetuity for the benefit of educational purposes 6 per cent. interest, but these do not constitute a debt in the proper sense of the word. The bonds were given the schools as evidence of the obligation to pay them an income certain, amounting to 6 per cent. per annum on the face of the bonds. These, added to the deficit, as evidenced by the warrants, make the total \$4,286,964.39, and until I can see the items on which the total shown by the Census Bureau is based, I could not verify the

'These bonds I speak of are \$165, 000 for the benefit of the State University and the Colored Normal; county bonds issued January 1, 1885, for school purposes, amounting to \$1,327,000, and the school bonds is sued May 12, 1892, amounting to \$606,-641.04. Then there are miscellaneous script and bonds aggregating \$6,394 never presented for redemption and

probably lost or destroyed. "The sinking fund balance of June 30, 1913, was \$10,306.57, instead of \$13,000, and \$80,000 had been loaned to the general expenditures fund. The decrease in the sinking fund since 1902 was due to the retirement

of all outstanding bonds. "Kentucky is practically on a cash basis; a great many expenses come out of the annual revenues which in other States are taken care of by bond issues and the State bears many expenses that in other States are borne by the counties. This makes comparisons of per capita indebted ness, especially when the difference n population between States is considered, of little or no practical ad-

WARD TELLS OF WORK OF COMMISSION DURING YEAR

J. Quincy Ward, Executive Agent of the Kentucky State Game and Fish Commission, told the members of the Kentucky Fish and Game Protective Association at Louisville that Kentucky would receive this year for the replenishment of the streams and fields 14,000,000 fish 100 pairs of Hungarian partridges and deer and quail in small quantities if purchaseable. Deer hunting will again be a Kentucky sport, according to Mr. Ward. Twenty-four deer are already ranging preserves in the mountains of the State. Quail will be the hardest to get, as there are no States that will allow these birds to be taken out of

The speaker criticized the Legisla-ture for its failure to pass better game protective laws. President Joseph G. Sachs announced plans for forming protective associations in most of the counties of the State. The destruction of more than 1,000 nets and traps last year has improved fishing in Kentucky streams.

### CONVICTS BEGIN WORK ON STATE PRISON FARM

Five convicts, all married men, and four of them serving sentences of twenty-one years for from two to this sort of filth on their feet and in manskaughter, left the Frankfort Refomatory Friday morning under the charge of J. B. Schnorbus, of Covington, superintendent of the prison farm, to inaugurate the work on the new reformatory experiment.

The men are Newton Arnold, of Pendleton county; W. W. Graham and Charles Renfor, of Carter county; Judge Watkins, of Breathitt county, and Fred Clifford, of Louisville, the last named serving a term of one to five years for grand larceny.

Warden Wells says he picked married men with families because, all other things being equal, they are more apt to be steady and less impelled to run away and become fugitives. The force will be increased from time to time, and it is expected that thirty or forty men will be employed on the farm, besides the consumptives, in a few weeks.

IF SKIN BREAKS OUT AND ITCHES APPLY SULPHUR

Use It Like a Cold Cream and Dry Ec zema Eruptions Right Up

The moment you apply bold-sulphur to an itching or broken out skin, the itching stops and healing begins, says a renowned dermatologist.

This remarkable sulphur made into a thick cream effects such prompt relief, even in aggravated Eczema, that it is a never-ending source of amazement to physicians.

For many years bold-sulphur has occupied a secure position in the treatment of cutaneous eruptions by reason of its cooling, parasite-destroying properties and nothing has ever been found to take its place in relieving irritable and inflammatory affections of the skin. While not always establishing a permanent cure, yet, in every instance, it immediately subdues the itching irritation and heals the Eczema right up and it is often years later before any eruption again manifests itself.

Any good pharmacist will supply an ounce of bold-sulphur cream, which should be applied to the affected parts unpleasant and the prompt relief afwhen the Eczema is accompanied with torturous itching.

Such Proof as This Should Convince Any Paris Citizen

The public endorsement of a local citizen is the best proof that can be produced. None better, none stronger can be had. When a man comes forward and testifies to his fellow-citizens, addresses his friends and neighbors, you may be sure he is thoroughly convinced or he would not do so. Telling one's experience when it is for the public good is an act of kindness that should be apreciated. The following statement given by a resident of Paris adds one more to the Whitesburg-The W. C.
